

"Gudi" is your partner in creative solutions for acoustical problems. We have wide range of comprehensive solution for every environmental and indoor acoustic.

Sonic Armour Resilient Bracket (CLIP) designed for improving the noise and vibration reduction of wall / ceiling system. The low profile bracket design can maximizes the room volume and provide the best noise insulation for wall and ceiling system.

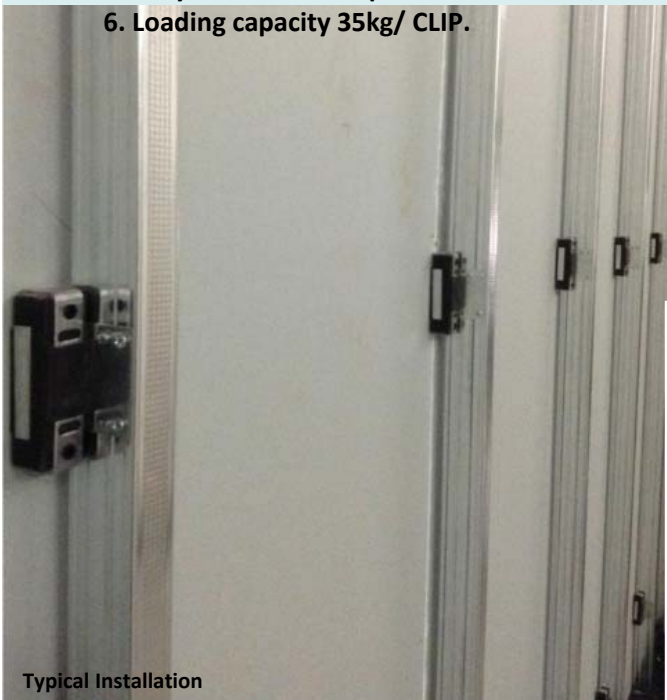

Advantage:

1. Easy installation, can adjust the level when install at non-smooth surface;
2. Suitable to apply for existing or new wall/ceiling system;
3. Cost effective, reduce the material cost;
4. No tailor-made furring channel requirement;
5. Only 60mm Void depth between walls;
6. Loading capacity 35kg/ CLIP.
